# CMA JUNE, 2020 EXAMINATION <br> KNOWLEDGE LEVEL <br> SUBJECT: IE 01. PRINCIPLES OF ACCOUNTING <br> <br> MODEL SOLUTION 

 <br> <br> MODEL SOLUTION}

## Solution of the Q. No. 2

i) This is referred to as the business entity concept. The financial transactions of a business have to be treated as separate from the non-business activities of the owner of the business. Only the financial transactions of the business are recorded and not those of the owner. The firm, or business, is regarded as a separate business entity. If the owner takes money out of the business for his own personal use, the accounts transactions show a debit on drawings to maintain this concept.
ii) This is the consistency concept which determines that accountants should treat some items in the financial statements on a consistent basis and adopt the same accounting policies from one year to the next. In the question the owner requests that the accountant should use a different way of calculating depreciation that had been used in previous years. This would contravene the principle of consistency.
iii) This is lead to the matching concepts: when a given event affects revenue and expenses, the effect on each should be recognized in the same accounting period
iv) This is the materiality concept, which is here having been applied for becoming expenses from assets. Materiality concept is important in the process of determining the Expenses and revenue for a given accounting period.
v) This is the accruals concept. An accrual is something that becomes due especially an amount of money that is yet to be paid, or received, at the end of the accounting period. Mr. Emdad's accountant record it on basis of accruals concepts

## Solution of the Q. No. 3(a)

Closing inventory (under the FiFO Method)

| $50 \times$ Tk. 190 | 9,500 |
| :--- | ---: |
| $500 \times$ Tk. 220 | 110,000 |
| $300 \times$ Tk. 230 | 69,000 |
|  | 188,500 |

(b)

| Sales | 410,000 |
| :---: | :---: |
| Return | (10,000) |
| Net sales | 400,000 |
| Cost of good sold (80\% on sale) 4,00,000X80\% | $=32,0000$ |
| Inventory as on 15 April 2020 | 5,00 000 |
| Less : purchases goods after $31^{\text {st }}$ march 2020 | (50340) |
| Add : cost of good sold after $31{ }^{\text {st }}$ march 2020 | 320000 |
| Closing inventory as on $31^{\text {st }}$ March 2020 | $\underline{769660}$ |

## Solution of the Q. No. 4 (b)

## Contra Entry

A contra entry is recorded when the debit and credit affect the same parent account and resulting in a net zero effect to the account. These are transactions that are recorded between cash and bank accounts
(c)

Work-in-process inventory is materials that have been partially completed through the production process. These items are typically located in the production area, though they could also be held to one side in a buffer storage area.
(d)

| Accrual-Basis Accounting | 2019 | 2020 |
| :---: | :---: | :--- |
| Revenue | 80000 | nil |
| Expenses | 50000 | nil |
| Net income | 30000 | nil |
| Cash-Basis Accounting |  |  |
| Revenue | 0019 | 2020 |
| Expenses | 5000 | 80000 |
| Net Loss | $(50000)$ | 00.00 |
|  |  | 80000 Net Income |

## Solution of the Q. No. 5

| Date | Description | Debit |  | Credit |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 2-Jun | Cash | Tk. | 7,200 |  |  |

## Solution of the Q. No. 8

(a) One principal advantage of separating the financial reporting from the management accounting department is that employees who are dedicated to their particular tasks develop expertise in these tasks. The financial reporting accountants can concentrate on the financial accounting and tax standards that must be used to stay in compliance with the country's accounting and tax regulations. They can also serve as liaisons with the external auditors. The financial reporting department can be responsible for the company's basic transaction and general ledger systems, ensuring that these systems reliably capture data and have adequate internal controls.
The management accounting department can work closely with the functional areas (for example, manufacturing, marketing, and engineering) that use management accounting information. This will ensure that the reports are timely and relevant for these internal users. If users wish to use specific accounting conventions (interest on capital employed, asset valuation and depreciation using current, not historical values), the management accountants can incorporate these conventions in their reports. Also, weekly and monthly operating summaries for internal information and performance measurement may not have to abide by financial accounting requirements (for example, on inventory valuation procedures). The management accountants can include nonfinancial operating information in the reports they prepare for employees and managers, and they can become familiar with how to access information from all the organization's information systems and databases, not just the general ledger. Also, some of the information might be judgmental, subjective, and based on rough estimates. This information might be accurate enough for certain internal uses, but not reliable enough for external reporting and external auditing requirements.
(b)

Req: (i)
Cost of materials used:
Materials inventory, beginning
Direct materials purchased
Cost of materials available for use
Less materials inventory, ending
Cost of materials used

Tk. 26,490
361,920
